Commissioner for Patents

The reply brief received October 1, 2008 has been acknowledged and entered.

Examiner would like to briefly note with respect to the argument on page 6, lines 3-5 of the reply brief, Example 2 of the instant application was used as a non-limiting example. Although, the thickness falls outside of the range in dependent claim 5, this does not preclude the results that are shown as applied to the invention as a whole. Furthermore, the comparison of example 5 to comparative example 4 still fails to show unexpected results, wherein the comparisons of the examples with the comparative example 4 are not commensurate in scope, as the materials compared are different (as set forth in the paragraph starting on page 11, line 18).

/PATRICK RYAN/
Supervisory Patent Examiner, Art Unit 1795
